OASIS: European sustainability innovators: building green competences in the construction sector

## About OASIS Project

The **OASIS project – European sustainability innovators: building green competences in the construction sector** – officially kicked off on 1 December 2024. An initiative supported by the Erasmus+ programme, it involves six partners from France, Italy, Greece and Bulgaria working together to tackle a common challenge: training green skills in the construction sector.

## OASIS Summer Camp Successfully Held in Paris!

From 29 June to 3 July 2026, CAPEB Grand Paris hosted the first international OASIS Summer Camp, welcoming VET students, trainers and project partners for an intensive week dedicated to sustainable construction, green infrastructures and vocational education.

The Summer Camp represented one of the key learning activities of WP3, allowing participants to complement the online training programme with practical experiences, technical visits and direct exchanges with professionals working in the construction sector.

During the week, participants explored innovative approaches to sustainable building, climate adaptation and energy efficiency.

Among the activities organised during the week were:

- Visit to the Praxibat technical training platform hosted by CAPEB Grand Paris.
- Workshops on sustainable construction techniques and green infrastructures.
- Visits to innovative projects including the Maison de la Nature, Climate Academy, Roofscapes, Lenin House rehabilitation project and La Défense district.
- Meetings with experts, apprentices and trainers working in energy-efficient construction, plumbing and building renovation.
- In-place visit to BTP CFA Rueil-Malmaison VET education centre.

Visit at Maison de la Nature

The Eco Challenge 2050

Visit at Academy of Climate

## WP3 – Launch of the blended training course on green skills

The implementation of the **WP3 Blended Learning Programme** is progressing according to the project timeline across all partner countries.

Each partner is advancing at its own pace, reflecting the different national contexts and recruitment processes, the consortium remains fully aligned with the planned schedule and milestones.

At this stage, the project is approximately **halfway through the piloting phase**, with both VET students (EQF Level 3) and construction professionals actively participating in the blended learning programme.

The pilot combines online learning through the **OASIS Moodle platform with webinars, practical activities and local workshops**, allowing participants to test the learning materials in real educational settings. The feedback collected during this phase will support the final refinement of the training resources before their full release.

# THE FOURTH TRANSNATIONAL PARTNER MEETING

On 29 June 2026, the OASIS consortium met in Paris for the 4th Transnational Project Meeting (TPM), hosted by CAPEB Grand Paris. Representatives from all the project partners gathered in person to review the progress of the project and coordinate the activities planned for its final implementation phase.

The meeting proved highly productive, allowing partners to discuss ongoing activities, align on upcoming deliverables and resolve operational issues quickly and efficiently. While regular online meetings ensure continuous coordination, face-to-face TPMs remain essential in European cooperation projects, enabling faster decision-making, more effective problem-solving and stronger collaboration among partners as the project moves towards its final stage.

## WHAT'S NEXT?

- Evaluation of the Summer Camp outcomes & QM.
- Completion of the pilot implementation of the Blended Learning Programme.
- Collection of participants' feedback and validation of the final content.
- Preparation of the next dissemination activities and final project events.
